Tab 1

Plan-
Dylan: Marketing, Make Linkedin Post. Sort out Uthman's Post. Sort out structure of webinar, how is it going to work. Sign-up form etc etc. LOGISTICS

Don: Merge the onboarding page with the current stuff on antigravity

Dylan Dhariwal - Linkedin post on my account about the webinar

Uthman announce linkedin post 2 things contained - announce 18 internship offers and webinar

One of our students landed 18 internship offers, how? Cold emailing

18 internship offers in 2 weeks. Rejections from firms like Morgan Stanley, Jane Street and JPMorgan didn't stop him. How did he do it? Cold emailing.

One of our students went from rejections by Morgan Stanley, Jane Street, and JPMorgan to 18 internship offers in 2 weeks. How? Cold emailing

The person we are targeting is someone that landed nothing at all and is really stressed

LINKEDIN POST IDEA - Lets shit on everyone elseo n linkedin in our post.

Everyones talking about cold emails, but we have real results.

Do you wanna make short-form content ahead of the webinar
Like tiktoks. Uthman can do em

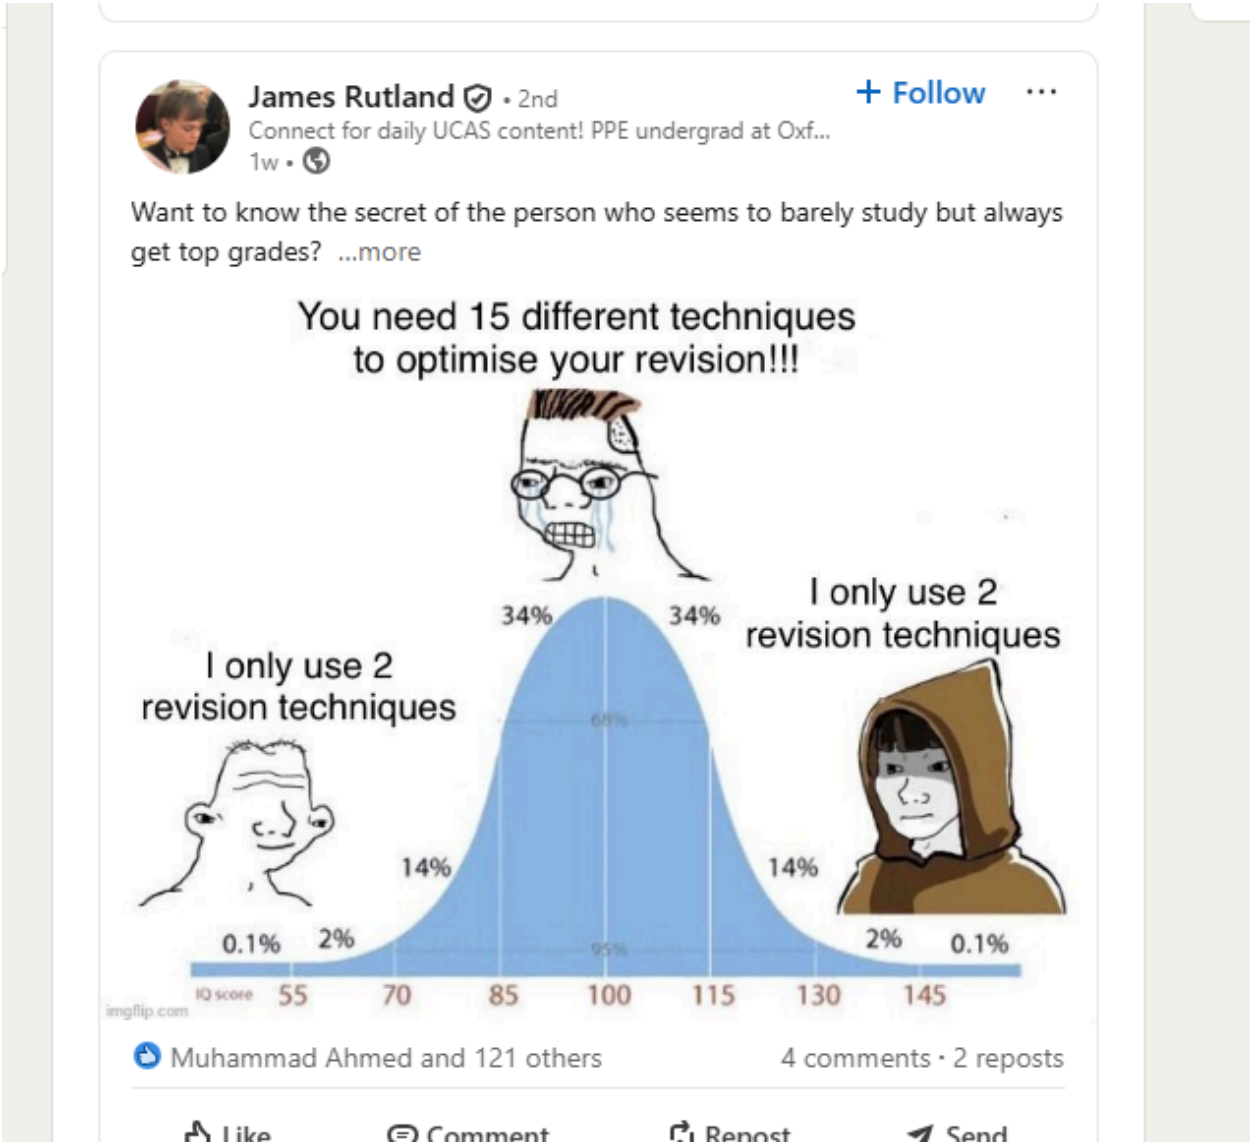
LINKEDIN POST IDEA - Send screenshots of any email acceptance offers for internships/ any proof. As much as you can

LINKEDIN POST IDEA - Cold email works for TOP FIRMS - oliver whinemann refferal

GROOM FIRST YEARS

Accountability. Lets make a life 360. Clone my keycard at a shop

LINKEDIN POST IDEA - Up and down diagram



Groom guys into reposting

LOGISTICS -

Interactive introduction - raise your hands if you applied to internships this year and wittle it down to cold emails.

Example - put your hands up if you applied to large firms, keep it up if you didn't hear back and you're still looking for an internship/placement of sorts.

Dive into intro/background

Competencies - offer rates/experience wtv.

Aim - what will you get from this session and how can you utillise it

Most important - a role of sorts

Deeper knowledge about chosen industry - different sub-sectors within it.

Network - YOUR NETWORK IS YOUR NETWORTH - something along the lines of networking events but without networking with one individual who also chats to like 30+ ppl during the event.

Step 0 - few Quality of life things you'll need before starting

Identifying sector/industry - can be multiple ntd.

CV - what does a good CV look like - follow-ups after saying ill send a template wtv.. And or share on briefly and go through it (TBC)

What do YOU want - an internship/a placement?

ALL of which you will learn during the process so don't stress!

Step 1 - getting the leads via Apollo

Live walkthrough (?) or using Screenshots clearly highlighting what we are doing and WHY and asking a member to give us an industry perhaps or something and then doing it from there

Example - someone says IB but wants to explore VC as well putting in all the key words etc

Going through each step clearly and explaining WHY this happens

Export apollo

Step 2 - now what?

Leads take X days to be delivered - stay busy - amend CV OR get started on the template.

Template - what does that look like? - pan to examples of my template

What if you don't have exp? - example shown on guide/adapted versino.

SHOWING CURIOSITY IS IMPORTANT

Step 3 - Leads are delivered

Showing how to export file into google sheets, what to cut and WHY and what your sheet shd look like - use a dummy as an example maybe?

Alongside Tick columns, columns for responses and meetings to track etc - later on.

Mail merge - going through it and explaining step by step what to do and what each step means

Also showing teething issues you might face and how to rectify them.

Example - spelling error/formatting error on mailmerge HAS to be amended in the CSV file not on the doc - won't save.

'edit indv documents' tab - see what your template would look like

And then sending - on first go maybe 15 in a day works - just to get familiar

You can bump up to 50 or wtv after that.

Step 4 - responses!

Show types of responses w real emails adapted to easier show

Rejection - no go away, no we don't have space check back w us/cv on file, no would love to talk - mentor opportunity/networking.

How to identify diff opportunities/what does that look like? How do I conduct myself etc.

Replying quick helps - helpful to have outlook notifs on to bypass DND for example or outlook open and will ping if connected to airpods etc.

How to stay on top - point where motivation fades and discpline takes over idk and how to keep going in 'tough' periods.

Step 5 - meetings

How to conduct yourself

Its okay to not know what you want/who you are - you will find it out over the course of the meetings

Be open and available to msot - b/c holidays ppl r flexible anyway prolly but spacing them out is crucial - will get a lot of meetings

Show ss of calendar or something idk to demonstratee it

If meett in person - always meet in person

Send a follow up - show what that look like pick out someth really interesting w covo and if you feel you really connected connect on linkedin - don’t force a connection if it isn't there.

IT IS A CHAT NOT AN INTERVIEW.

Step 6 - Followups importance.

Showing on spreadsheet how I would track them but also do my follow-up emails efficiently the night before the morning (will explain this)

Perstistence is key - wouldn't have gotten my effort without it.

Ntd to double-text someone they’re busy ppl.

Step 7 - rinse and repeat - you'll slowly learn more about yourself.

Step 8 - idk plug the sessions for help
a
All of which can be expanded and amended when we make the ppt or we present on.

Spring week conversion

After receiving 20 internship offers, 1000 cold emails, and a 21% response rate, I'm delighted to announce, by the Grace of God, my placement at Hirondl as a Junior Consultant.

All from cold emailing, but how did I get here?

After seeing countles

After seeing countless videos promoting cold-emailing, I decided to give it a go and after 4 attempts trying to send 15 emails, I received my first response - a rejection but a small victory.

Everyday I sent 50 emails, and became increasingly invested the more responses I gained, learning more about the industry and meeting new people - a networking hack. Instead of going to networking events, I was creating my own networking and accelerating my personal development.

But why am I telling you this?

One morning after sending my emails, I read a disturbing article citing the number of grad jobs falling under 10,000 for the first time EVER, whilst responding to an email asking if I would be interested in a full-time position. And so, I wanted to instead use this new found knowledge to help students do the hard part : get the experience graduate employers require.

That is why on INSERT DATE I am hosting a webinar with EarlyEdge to help students replicate the same success I did. Sound interested? I will be sending the emails that landed me these offers to anyone that connects with me, and comments EMAIL under this post. Here's the sign up link > Remember there is no harm in t

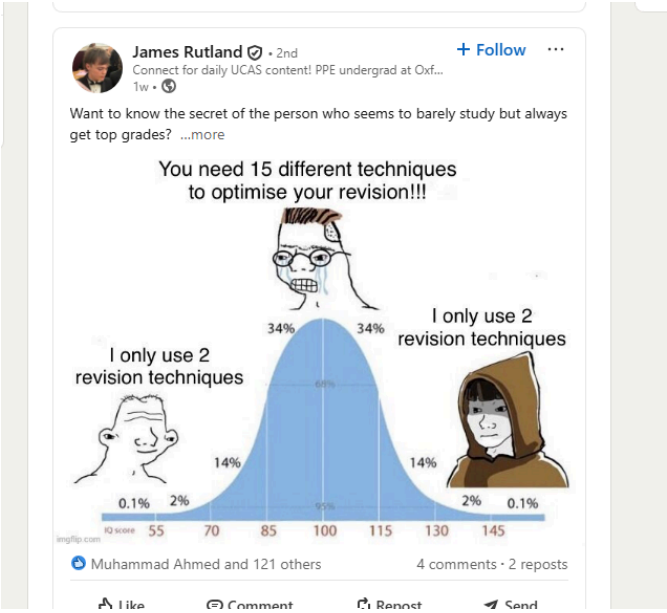
Posts

Post 1: Misconception that you can't land top firms through cold email - OW referral

Post 2: Everyone else is waffling and has no results + 18 offers image

Post 3: Iq scale



Sales tactic = I realised your biggest strength is your determination

Our student Uthman Mahmood landed 18 internship offers in two weeks.

One line = 18 in 2 weeks.
Other line = we are different to everyone else

A lot of people on this platform say XYZ about cold-emailing, we have real proof. Our student uthman, after JPM,MS,Jane street rejections…

Haven't landed a summer internship?

One of our students landed 18 internship offers in two weeks. Everyone posts about cold emailing on here but what he did is completely different.

And the way he done is different to what everyone else is saying on linkedin

You're a bum. This guy got 18 offers in two weeks. Wtf r u doing.

If you still don't have a summer internship - someone just landed 18 offers in two weeks. How? Cold Emailing

No internship? One of our students landed 18 offers in the last two weeks. After rejections from firms like MS, JPM, and Jane Street, he's now running a live webinar breaking down exactly how he did it - and it's nothing like the cold-emailing advice on this app

18 internship offers in two weeks.

If you haven't landed a summer internship at firms like JPM, MS, and more, one of our students is breaking down how he did it

If you still don't have a summer internship - one of our students just landed 18 offers in two weeks.

—----------

FINAL POST DYLAN DHARIWAL POST 2 =

Still no summer internship? One of our mentors received 20 internship offers in three weeks. And we've got proof.

That's not a typo - 20 internship offers in the space of three weeks. That's after rejections from firms like JPM, MS, and Jane Street.

Everyone on Linkedin talks about cold-emailing. Very few of them can show you that it actually works.

Subject line tips, personalisation hacks, etc. its all the same advice, recycled every year.

What Uthman did was completely different.

If you're looking for internships in 📊 Finance, 💻 Tech, 📋 Consulting, and 🏛️ Law, this will change everything.

On __ March, Uthman Mahmood is running a 1.5 hour live webinar, breaking down the entire process from start to finish:

✅ How to find the right person at the right firm using Apollo.io
✅ The template that got him a 21% response rate
✅ How he ran MASS outreach WITHOUT it looking automated
✅ The nightly follow-up routine that kept his pipeline alive
✅ How he turned conversations into ACTUAL offers

Want the sign-up link?

2) Send me a connection request
3) Drop your email below and I'll send it over.
━----------

If you're looking for internships in 📊 Finance, 💻 Tech, 📋 Consulting, and 🏛️ Law, this will change everything.

What's included:
The research process - how he built his hit list of firms
📧 The subject lines that actually got opened
🔁 An exact follow-up timeline - when, how often, and what to say
💰 How to turn one reply into an actual offer

18 internship offers in two weeks. After rejections from Goldman, JP Morgan, and Jane Street.

We have the screenshots.

Everyone on here talks about cold emailing. Nobody shows you the actual system behind it. On [DATE] Uthman is going live for 1.5 hours showing exactly what he did:

🎯 How to find the right person at the right firm using Apollo.io
📧 The template that got him a 21% response rate
📨 How he ran MASS outreach without it ever looking automated
🔁 The nightly follow-up routine that kept his pipeline alive
💼 How he turned conversations into ACTUAL offers

Comment "webinar" below and we'll send you the link directly.

Okay start is calm, but we should include more detail about what's included within the webinar, right now there is a lot of motivational language but little about the webinar. Also we should use

language that really highlights how different our advice is to everyone elses. E.g. ‘an exact follow-up timeline - THIS IS WHAT EVERYONE GETS WRONG’

Want the sign-up link?

ANOTHER POST DYLAN-

Post 1: Misconception that you can't land top firms through cold email - OW referral

Most would never think of cold emailing a firm with 7000+ employees. Our coach Uthman did, and got an internship referral at Oliver Wyman.

People say you can’t email large firms like JPM, MS, Jane Street. You can - you just need to know the right people.dd.

We’re releasing our cold email checklist for FREE - the same one Uthman used to achieve a 21% response rate, when normally people get a 3-4% response rate.

Blah blah blah

Want more than the checklist?

On __ March, live for 1.5 hours to break down… sign-up link below
